

## Macintosh Safari Setup Guide

- Select **Safari** on the menu bar.
- Click the **Security** icon
- Under **Web Content** section, check **Enable Plug-ins**, **Enable JavaScript**, and **Enable Java**. Uncheck **Block pop-up Windows**.
- Under **Accept Cookies** section, check **Always** or **Only from Sites you Navigate to**.
- Select **Safari** on the menu bar.
- Click **Reset Safari** to clear the History, the Cache, and the Cookies all at once. A confirmation screen appears and click **Reset** to finish emptying the Cache, Cookies, and History.
- Select **Safari** on the menu bar and select **Preferences** from the menu.
- If you only want to clear the History, click the **History** menu, then click **Clear History**.
- If you only want to clear the Cache, click the **Safari** menu, then click **Empty Cache**.
- If you only want to clear the cookies, click **Security** icon, click the **Show Cookies button** and click the **Remove All** button to delete all the cookies
